SICIS®

VETRITE[®] ExtraLastre

Nasce attraverso una intensa attività di ricerca volta alla realizzazione di nuove evoluzioni dei materiali decorativi di lusso da rivestimento, ed è per SICIS un passaggio naturale, dalla tessera di mosaico fino alla grande lastra. Il vetro, materia intrinseca al DNA dell'azienda, con l'applicazione composita di tessuti e film polimerici che ne diventano il cuore, è il protagonista di queste lastre di grandi dimensioni. Il formato può arrivare a **120x280 cm** con uno spessore da **6 mm** fino a 12 mm, in caso di particolari utilizzi.

Nella Factory di SICIS e negli Atelier si mescolano saggiamente tecniche e alchimie, abilità manuali e arte ed è in questo ambiente che trova forza una precisa intuizione, creare un prodotto all'avanguardia dal punto di vista innovativo ed estetico, che supera la barriera delle dimensioni.

La Vetrite è per SICIS la capacità di pensare il rivestimento senza vincoli di alcun tipo, uno stile, un'arte decorativa, evocativa, preziosa, capace di donare emozioni, svelare trame esclusive, pattern unici, colori suadenti.

Questo prodotto, puro e tenace, è particolarmente versatile e eclettico, adatto ad esplorare utilizzi sia negli ambiti abituali di applicazione, nei rivestimenti di interni, sia in settori come l'arredamento, rivestimento di mobili, top, porte, luci, fino al design. Vuole essere una migliore e raffinata alternativa alle lastre di porcellanato. SICIS è orgogliosa di presentare Vetrite, dedicata all'amore e alla passione per la bellezza del rivestimento di qualità, elemento distintivo, forza e carattere di ogni ambiente.

A natural evolution from mosaics to large surface coverings, SICIS inhouse R+D and creative teams through intensive research have developed a new and unique large format collection. SICIS Art Factory meticulously mixes technology and alchemy with artisanship in this collection that finds a precise intuition creating a truly avante garde and unique aesthetic

*Glass, an intrinsic material in the DNA of SICIS, is now once again revolutionized whereby SICIS iconic fabrics are sandwiched with polymer film (rendering it resistant) between large format glass slabs. These unprecedented thin glass slabs are available up to **120x280 cm** in either **6 mm** or 12 mm thin, depending on the particular application.*

Vetrite provides the freedom to think about cladding without any kind of constraints in style. A decorative art, evocative and precious able to provide custom design solutions by revealing unique textures and patterns and subtle color palettes.

This product is both pure and strong and particularly versatile for all design styles. Suitable for an infinite range of applications such as furniture, counters, doors and lighting, providing unprecedented design solutions.

SICIS is proud to present Vetrite, dedicated to the love and passion of providing distinctive quality and character to every application.

Electric Marble Cal Natural Sx

Electric Marble Cal Gold Sx

Electric Marble Cal Fuxia Sx

Electric Marble Cal Silver Sx

Electric Marble Cal Turchese Sx

SICIS stupisce il mondo con i nuovi Electric Marble che sembrano uscire dalle più ardite tonalità di sintesi.

Alla naturale gamma del Marmo si è voluto aggiungere un particolare effetto neon per creare qualcosa di unico, di introvabile, di rivoluzionario.

Il Marmo prende vita all'interno delle venature come fosse colpito da bagliori metallici per creare lastre in vetro con tonalità metallizzate energiche che possano rendere unico ogni ambiente.

Le lastre Electric Marble sono disponibili nei formati standard 120x280 cm e sottomultipli, e nel formato Big con misura 138x290cm.

SICIS is "electrifying" the market once again with an innovative treatment to a centuries old material, marble.

In the inimitable voice of SICIS we present an ameliorated version of this noble material, created in our Vetrite versatile glass slabs.

Infusing new life by injecting precious metals into the veins which reflect and glow the various shades of metallic hues.

Electric Marble slabs are available in standard sizes 47 1/4"x110 1/4" and submultiples, and in Big format with measures 54 3/8"x114 1/8".

DESCRIZIONE TECNICA DI VETRITE

Vetro tecnico decorativo, ottenuto mediante la combinazione di polimeri in fase liquida, lamine metalliche e fibre tessili. Vetro composito versatile ad elevata tecnologia in grado di soddisfare i requisiti estetici, tecnici e ambientali più ambiziosi. Spessori 6 mm - su richiesta per applicazioni speciali può variare da 4 a 12 mm. Per uso a pavimento si consiglia lo spessore da 10 mm. con finitura SICISgrip*.

TECHNICAL DESCRIPTION OF VETRITE

Thin glass slabs in large format made with an array of polymer films, thermofoil, metal foils or fiber textiles.

Highly technical characteristics allowing for a multitude of applications.

Thickness 6 mm – for special applications thickness from 4 to 12mm can also be available.

For floor applications we suggest 10 mm thick with SICISgrip treatment.*

VETRITE E AMBIENTE

La versatilità della tecnologia VETRITE consente, su richiesta, di fornire il prodotto anche partendo da vetri speciali pretrattati quali autopulenti, antibatterici etc...

I vetri speciali a pulizia facilitata sono caratterizzati da uno strato sottile e trasparente che ha proprietà fotocatalitiche e idrofile molto efficaci nel mantenere pulita la superficie. Lo strato fotocatalitico utilizza la doppia azione dei raggi UV della luce solare e dell'acqua per rimuovere lo sporco che si accumula sulla superficie del vetro.

VETRITE AND ENVIRONMENT

On request, Vetrite can be produced pretreated with a self-cleaning and antibacterial surface.

This easy to clean treatment is characterized by a thin, transparent layer that has hydrophilic and photocatalytic properties which are very effective in maintaining a clean surface.

The photocatalytic layer uses double action from UV rays from the sun and water to remove dirt that accumulates on the glass surface.

VALUTAZIONE DELLA QUALITÀ

Metodi di ispezione

Vetrite deve essere osservata in una posizione verticale, ad occhio nudo e in normali condizioni di luce diffusa (naturale o artificiale, tra 300 lx e 600 lx), da una distanza di 1 m.

La direzione di osservazione è normale, cioè perpendicolarmente, alla lastra di vetro. L'uso di una fonte di illuminazione aggiuntiva, ad esempio riflettori, non è permesso.

QUALITY EVALUATION

Handling and Inspection

Vetrite shall be inspected in a vertical position, with the naked eye and under normal diffused lighting conditions such as daylight (between 300lx and 600lx) from a distance of 1 m.

The use of additional lighting sources and/or spotlights is not acceptable.

Requisiti dimensionali

Per le dimensioni inferiori o uguali a 2000 mm, la tolleranza standard è +/- 1 mm della dimensione nominale.

Per le dimensioni superiori a 2000 mm, la tolleranza standard è +/- 1,5 mm della dimensione nominale.

La tolleranza da applicare è determinata dalla dimensione massima della lastra.

La tolleranza dell'ortogonalità è espressa come la differenza di lunghezza tra le dimensioni diagonali della lastra.

Per lastre con entrambe le dimensioni inferiori o uguali a 2000 mm, la differenza non deve essere superiore a 3 mm.

Per lastre con uno (o entrambi) dimensioni superiori a 2000 mm, la differenza non deve superare i 4 mm.

Dimensional requirements

For dimensions less than or equal to 2000 mm, standard tolerance is +/- 1 mm of the nominal value.

For dimensions over than 2000 mm, standard tolerance is +/- 1,5 mm of the nominal value.

The standard tolerance range to be applied shall be determined by the largest slab dimension.

The squareness tolerance shall be expressed as the difference in length between the diagonal slab dimensions.

For slabs with both dimensions less than or equal to 2000 mm the difference shall not exceed 3 mm.

For slabs with one (or both) dimensions greater than 2000 mm the difference shall not exceed 4 mm.

FISSAGGIO DI VETRITE - RIFERIRSI AL MANUALE DI POSA

L'installazione e la pulizia di Vetrite devono essere idonei all'ambiente di destinazione.

Vetrite può essere danneggiato, questo dipenderà in larga misura dall'ambiente in cui viene utilizzato.

Devono sempre essere considerate le seguenti raccomandazioni:

- I materiali di fissaggio utilizzati non devono essere di natura aggressiva.

- Quando Vetrite viene inserito in profili, i bordi possono essere danneggiati da condensazione, agenti chimici (detergenti, ecc) che possono rimanere all'interno del profilo.

- La superficie e la massa del materiale del substrato a cui Vetrite è fissato deve essere pulito, asciutto, privo di umidità, acidi, alcali e altri materiali aggressivi.

- Le istruzioni del produttore di adesivi, devono essere sempre seguite.

- Tutti gli adesivi e prodotti utilizzati devono essere compatibili con Vetrite.

- La selezione e l'applicazione di adesivi/prodotti chimici, insieme con la scelta del substrato e preparazione per il fissaggio Vetrite, è esclusivamente a discrezione e responsabilità dell'installatore.

- La selezione del detergente per la pulizia di Vetrite, in base alla destinazione d'uso, è esclusivamente a discrezione e responsabilità dell'installatore.

- Sicis è disponibile ad assistere e suggerire gli installatori.

- Per i colori Alma, Aluminium, Antique, Antique Ocra, Antique Blue, Antique Green, Mirror, Vis One e Vis Two è necessario seguire le avvertenze

di posa della collezione Colibri e Colibri Tide presenti a pag. 7 del Manuale di Posa Sicis Rev 8 Dic 2016.

INSTALLATION OF VETRITE - REFER TO THE INSTALLATION MANUAL

General recommendations:

- Vetrite should be used in suitable environments and should be cleaned and maintained per suggestions.

- Vetrite material should be handled with care.

- The Vetrite should be clean, dry, free of humidity, acid, alkali and any other aggressive chemicals like cleaning agents when installing and also when using profiles.

- Recommended manufacturer's adhesives should be strictly observed.

- All adhesives and chemicals used should be compatible with Vetrite.

- The selection and application of adhesives and chemicals, along with the choice of the substrate and preparation for installing Vetrite, is solely at the discretion and risk of the installer.

- Sicis is available for any assistance and suggestions.

- For the following colors (Alma, Aluminium, Antique, Antique Ocra, Antique Blue, Antique Green, Mirror, Vis One e Vis Two) see our installationmanual, Colibri, Colibri Tide section, pag. 7 Rev 8 Dec 2016.

PULIZIA E MANUTENZIONE

Un'accurata e regolare operazione di pulizia non solo preserva le qualità estetiche delle superfici, ma ne mantiene anche inalterate le caratteristiche, asportando polvere e depositi aggressivi.

Le operazioni di pulizia devono essere eseguite manualmente o con idonea attrezzatura dall'alto verso il basso.

Vetrite Collection è realizzata con diversi materiali con differenti caratteristiche e resistenze.

Si raccomanda in ogni caso di fare preventivamente un test di pulizia su una porzione limitata della superficie da trattare per verificare la compatibilità del detergente.

Non spruzzare il detergente direttamente sulla superficie del materiale, ma sul panno morbido e pulito.

Non utilizzare detergenti abrasivi e aggressivi.

CLEANING AND MAINTENANCE

A thorough and regular cleaning not only guarantees the exterior finish of the surface but also preserves its quality by removing dust and aggressive deposits. Cleaning operations must be done manually or by using suitable cleaning equipment from top to bottom.

Vetrite Collection is made by several materials with different properties and resistances.

We recommend you to first try the cleaning product on a small portion of surface so to make sure that it will not be affected.

Do not spray the cleaning product directly to the surface but on a soft cleaning cloth.

Do not use abrasive or aggressive agents.

* SicisGrip è un trattamento in fase produttiva volta a creare una superficie antiscivolo conforme con lo standard ANSI A137.1 per DCoF

* SicisGrip is a treatment during production that creates a slip resistance surface and complies with the ANSI A137.1 standard for DCoF
