Nexion about

Nexion is a brand of Nexion International, a multinational ceramic company that is the result of a partnership between two large family groups that have always been leaders in their reference markets: Ceramiche Speranza, the best in its class Italian firm founded in 1961, that has setup the state of the art manufacturing facilities in India together with the Aghara family, one of the leading players in ceramics and sanitary wares in India since 1977.

With mastery of technology and design, we turn the best of the Italian tradition and lifestyle into contemporary ceramic surfaces that can be source of inspiration for architects and designers around the world.

Open-minded and keen to learn from customers and partners, we are committed to deliver the best quality and service and we believe that our work ends when our clients fulfill their desires and achieve their goals.

Nexion's Essence

We are guided by complementary values.

On the one hand, our **long experience** in the field has given us mastery of technology and design; on the other, we are curious and **open-minded**, keen to learn from our customers and the partners we work with.

We are reliable and have a solid ground in our operating procedures, but we are also **dynamic** and in constant pursuit of new ideas.

We are confident in what we do, but ready to move out of our comfort zone to **experiment and innovate** when the market demands that.

Our pledge is to exploit **Italian creativity**, rooted in the hundreds of years of our country's history and way of life, to create beautiful products that can be source of inspiration for architects and designers around the world.

We set for ourselves standards of excellence in terms of **aesthetics, quality and performance**.

We believe that service is as important as manufacturing as our work ends when our clients fulfill their aspirations and achieve their goals.

We are reliable and have a solid ground in our operating procedures, but we are also dynamic and in constant pursuit of new ideas.

Our Company

Nexion is a brand of **Nexion International**, a multinational ceramic company that is the result of a partnership between two large family groups that have always been leaders in their reference markets: **Ceramiche Speranza**, the best in its class Italian firm founded in 1961, that has setup the state of the art manufacturing facilities in India together with the **Aghara family**, one of the leading players in ceramics and sanitary wares in India since 1977.

Ceramiche Speranza and Aghara family have many elements in common: both of them are **positioned in the high end of the respective markets** and both are led by entrepreneurs who share similar values and goals.

The joint venture company, named **Nexion International Pvt. Ltd.**, designs, produces and sells worldwide high quality porcelain (Glazed Vitrified) slabs and large-size tiles in 9mm and 6mm thickness, under the brand Nexion. Porcelain slabs in sizes such as 800x2400mm and 1200x2400mm represent the latest and

nicest segment of tiles offering, using new generation of press technology and advanced digital printing and glazing to create **superior tiles**, of beautiful aesthetics and impeccable quality, resembling natural and artificial surfaces as stone, wood, cement and so on.

The main claim of Nexion brand is **“Designed in Italy to inspire the International Dreamers”**. To this aim, Nexion’s value chain is global rather than local: all products are designed in Italy, manufactured in India, in the company’s state-of-the-art plant, using the very latest Italian technology, and sold in **more than 50 countries**, through subsidiaries, partners and clients service teams located in key target markets, with marketing, quality management and global customer services in Italy.

All products are **quality certified** according to international standards and undergo tests in the most reliable Italian labs.

Our People

We are a **young dynamic** company, with a strong **multicultural vocation**. **350 people** use their passion, enthusiasm and highly specialised skills to turn the important targets we have set for ourselves into positive results.

Among them, the ambition to combine the best of **Italian creativity** and technology with the integrity and traditional assiduity of **Indian manufacturers**, to create the highest quality exclusive products to enrich people's lives.

A goal that can only be reached by creating a successful and well integrated teams with some of the most **talented people** of these two cultures, both rich in history, **tradition and values**.

350 people use their passion, enthusiasm and highly specialised skills to turn the important targets we have set for ourselves into positive results.

Surface: the quintessence of lappato

Mastering polishing technique, Nexion has given to Marble Collections the beauty of the contemporary “lappato matt” alongside the evergreen “full lappato” surface.

Full Lappato is the most notable marble surface in interior design. With perfect mirror reflection, obtained by superior glaze quality and master-class polishing, this surface exalts the graphics and the deepness of fine marble slabs. When made to perfection, the result is an absolutely flat surface, with waving-free reflection.

A result very difficult to achieve in ceramics, that Nexion has accomplished.

Lappato Matt is a contemporary interpretation of marble surface, with its characteristic absence of any reflection. Dedicated to the world of design, architecture and furniture, this finishing exalts the details of veins and colors of carefully selected marble slabs.

This surface is not easy to produce in ceramics and Nexion has achieved excellent results in aesthetics and durability.

Marble Collections surface deliver extraordinary performance. Full lappato reaches 95 on the Gloss scale – a measure of reflection in which high values mean highly reflective surface and low values absence of reflection – higher than the average of top Italian products. Lappato Matt is as low as 8 on the Gloss scale, among the best results achieved by leading producers.

Gloss: 95

Lappato matt

Gloss: 8

Textures: the “chiaro-scuro” light effects

Combining in-depth material research, innovation, and great craftsmanship, Nexion has created three eye-catching **three-dimensional textures**: rigato, pettinato, and bocciardato.

The textures offer the same visual and tactile richness as the most prestigious varieties of marble when they undergo these craft techniques, which are the culmination of centuries of **constant, progressive honing**.

The result is the creation of up-to-the-minute ceramics that combine the high reflective power of Nexion marble with a textural approach to light that produces striking, **ever-changing visual effects**.

An extremely difficult result to achieve in ceramics and a material that fuses the eternal, timeless charm of marble with a **vibrant contemporary flavour**.

MARBLE | Leptis

Leptis collection recalls the exotic taste of unique marbles during the splendor of Leptis, the most important African city of the Roman Empire, renowned for its lavish architectural treasures. The impressive colonnaded street, the fascinating theater and the sumptuous private residences are only few of the wonders found in this ancient thriving city.

Nexion has selected three extremely particular and attractive types of marble - Amani Bronze, Breccia Aurora and Grigio Terra - to devise deep and transparent surfaces enhancing the graphic of this prestigious material. Being master of craftsmanship, Nexion has perfected its polishing techniques giving to its full lappato finish an exceptional reflecting power.

The result is a collection that interprets the fascinating charm of some of the most precious and particular marbles of the ancient Roman Empire with a contemporary design ideal for the most ambitious projects. Leptis brings the best inspiration of Italian style in every type of space and environment.

Nexion installation suggestions

Nexion recommends 2 mm joint for optimal aesthetics taking advantage of the tiles caliber in multi-sized applications. Both cement and epoxy grout can be used; grout-design color matching advisable for optimal aesthetics. It is not recommended to use grouting with coloured pigments in contrast with the colour of the tiles.

Breccia Aurora 120x120 Full Lappato

MARBLE | Signature

Signature collection is a tribute to marbles of rare beauty, quality that make them extremely sought-after: Rosso Levanto, named after the Ligurian city from which it originates and where, over the centuries, has been used to give life to many monuments and Irish Green, originally from Connemara, with whom were made jewels, sculptures and other prestigious artifacts found in ancient palaces, residences and important architectural complexes.

Thanks to its perfect mastery of craftsmanship and polishing techniques, Nexion has created captivating surfaces able to capture the chromatic perfection of these two materials: from blood red towards purple furrowed with thin white veins of Rosso Levanto, to the uneven green embellished with translucent white veins of Irish Green.

The result is a portfolio of an undisputed prestige enriched by the uniqueness of exotic marbles with contemporary design, making this collection an attractive alternative to the most demanding customers. A collection that brings the best contemporary Italian design in every type of space and environment.

MARBLE | Texture

Texture collection brings back the intense visual and tactile experience inherited by the most prestigious and wise marble processing methods. Century old practices refined and perfected overtime bring further nobility to stones already rich by their very nature.

By restlessly studying these processes down to the smallest detail, Nexion has selected three precious marble variants - Statuario, Pulpis Grigio and Crema Europa - devising surfaces that exalts the aesthetic range of their graphics with three variety of 3D textures: “rigata”, “pettinata” and “bocciardata”. Surfaces that, given the high reflecting power of Nexion marbles, are able to give life to fascinating and unprecedented optical effects.

The result is an exceptional 3D textured collection, able to attribute a vibrant contemporary design to an element of timeless charm as marble. A collection that brings the best inspiration of contemporary Italian design to every type of space and environment.

MARBLE | Apuane

Apuane collection brings the flavor of the prestigious marbles extracted in the Apuan Alps (Alpi Apuane in Italian), site of the most important Italian marble quarries since the Roman times. Prestigious and rich materials that have marked architecture over the centuries.

Nexion selected four of the finest marbles to create deep and transparent surfaces, with the elegance of black and white, as well the warmth of beige and brown. Mastering polishing technique, Nexion has given to Apuane the beauty of the contemporary lappato matt alongside the evergreen full lappato surface.

The result is an elegant collection that belongs to the most recent trend of contemporary design and architecture. A collection that brings the best of the inspiring Italian design to any type of ambience and location.

MARBLE | Kair

Kair collection evokes the beauty of the prestigious marbles excavated in the mountains that surround Carrara, Kair in the ancient times, town capital of Italian marble since the Roman Empire. Rich materials that, thanks to a simple and classical elegance, wrote important pages in the history of classic and modern architecture.

Nexion selected four of the finest marbles and created four slabs of contemporary designs and colours, ranging from the timeless elegance of black and white, to the warm and enveloping shades of brown and beige. With craftsmanship and passion for details, Nexion has given to Kair two suggestive surfaces, the super-reflective full lappato and the sober lappato matt.

The result is a collection who speaks of timeless elegance, preciousness and a classical taste in a contemporary aesthetical language. A collection that brings the best of the inspiring Italian design to any type of ambience and location.

MARBLE | Pompeii

Pompeii collection conveys the richness of some of these precious marbles used since the Roman age to place the milestones along the most important ways of communication and elevates the status of prestigious patrician villas and mansions.

Nexion selected four among the finest marbles and created slabs in eye-catching color variations ranging from the classical beauty of white Italian lasa to the richness of beige Iranian onyx, to intense tones of grey pulpis and dark brown emperador. With great craftsmanship, Nexion has exalted these stones with two captivating surfaces: the contemporary lappato matt and the super-reflective full lappato.

The result is a collection that translates the timeless charm of some of the most precious marbles in a contemporary language, ideal for the most ambitious design projects. A collection that brings the best of the inspiring Italian design to any type of ambience and location.

Nexion interprets Stone

STONE | Pietra del Cardoso

Pietra del Cardoso collection inherits the spirit of the homonymous Italian stone extracted from the mountains of Tuscany, home of most famous marble quarries in the world (Alpi Apuane).

A material appreciated for centuries due to its extraordinary longevity, resistance, style and functionality.

Nexion has accurately selected some of the most exclusive specimens conveying the essence of Cardoso into a new unique ceramic material, combining elegance with unrivalled technical qualities. Nexion has bring this stone to the next level, devising an extremely durable surface, highly resistant to chemicals, stains and abrasions which makes it particularly suitable for high traffic public spaces.

The result is an extremely wide and versatile offering, divided into six colors, five sizes, three surfaces and two anti-slip finishes. A collection that bring the best inspiration of contemporary Italian design in every type of space and environment.

Nexion installation suggestions

Nexion recommends 2 mm joint for optimal aesthetics taking advantage of the tiles caliber in multi-sized applications. Both cement and epoxy grout can be used; grout-design color matching advisable for optimal aesthetics. It is not recommended to use grouting with coloured pigments in contrast with the colour of the tiles.

Beige Medio 60x120

STONE | Runa

Runa collection brings the essence of the noble and sophisticated character of the slates found in the countryside, villages and historical cities of Northern Europe. Stones that blend harmoniously with the elements of nature in a very contemporary style.

Though these stones are common in Europe, finding the nicest one is not easy.

Nexion has worked to recreate the taste of those suggestive slates that blend naturally in the architectural works of contemporary urban contexts. By the perfection of design and the hands of skilled craftsmen, Nexion has given to the surface of Runa the character of the best natural stones, strong at sight and gentle at touch.

The result is a ceramic collection that returns the sober and harmonious elegance of slates with a modern and dynamic mood. A collection that brings the best of the inspiring Italian contemporary design to any type of ambience and location.

Nexion interprets Travertine

TRAVERTINE |

The Travertine collection conveys the deep flavor of the homonymous sedimentary rock, with a very porous consistency, used in ancient Rome to enrich monuments and private residences. Rediscovered in the following centuries, Travertine became symbol of Baroque architectural treasures that can still be admired today in Rome and in many other Italian cities.

Thanks to its raw materials knowledge, and perfected the most advanced polishing techniques, Nexion devised a new deep and transparent surface reinterpreting the beauty of Travertine vein cut, a technique that has been used since ancient times to make veins visible.

The result is a collection that attributes a contemporary personality to a stone of great prestige, a symbol of timeless beauty that keeps its charm intact over the centuries. A collection that brings the best inspiration of contemporary Italian design in every type of setting and context.

Nexion interprets Concrete

CONCRETE | Endless

Endless collection inherits the expressive power of concrete, a material who wrote important pages in the history of architecture and plays a fundamental role in modern design thanks to the capability to radiate a strong tactile energy to every context surrounding it.

Seduced by the architectonic and stylistic potential of concrete, Nexion examined to the smallest the remarkable artifacts made by Italian craftsmen, characterized by the intense touch and feel of this matter. In its design lab, Nexion worked to give to large size slabs the delicate variations of tones that we find in the small, renown Italian cementine, creating the soft effect of an “endless” surface.

The result is a ceramic collection made unique by the shade variations, sharp patterns and a high tactile vocation, which transmits a timeless and contemporary personality to the surrounding space. A collection that brings the best of the inspiring Italian contemporary design to any type of ambience and location.

Nexion interprets Wood

WOOD | Essenze

Essenze brings the intense taste of four precious woods that are highly appreciated in the architectural field for their ability to combine solidity and durability with refined natural elegance. Through extensive researches, Nexion has selected some of the most renowned varieties of Eucalyptus, Walnut, Middle Oak and Tortora Oak, characterized by fascinating patterns of knots, veins, nuances and other natural elements.

Inspired by their beauty, Nexion has devised a new sintered surface that transmits all the wood warmth and elevate its technical features. Among those, this surface is extremely durable, highly resistant to chemicals, stains and abrasions which makes it particularly suitable for high traffic public spaces. Essenze is offered in 20x120 size to be even more bonded to its natural inspiration.

The result is a collection that interprets the spontaneous and authentic charm of prestigious essences with a modern language, making it functional to the realization of the most ambitious projects. Essenze brings the best inspiration of contemporary Italian design in every type of space and setting.

WOOD | Coniwood

Coniwood collection brings the peaceful and elegant essence of the trees that make up the fascinating coniferous forests of Europe. Trees that stand out for the natural flavor of the wood they are made of, that conveys an intense sense of warmth and comfort and a refined time-worn feel.

Not all woods transmit the same sensation of immediate and instinctive elegance. Through accurate research, Nexion has selected the some of the nicest exemplars in the European coniferous forests, unique in their warm tones, intense nuances, and suggestive vein patterns. Inspired by them, Nexion carefully worked out designs that make long planks look beautiful and created natural surfaces by the hands of skilled craftsmen.

The result is a ceramic collection of that returns all the natural flavor, at sight and touch, of natural wood, in an eye-catching contemporary style. A collection that brings the best of the inspiring Italian contemporary design to any type of ambience and location.

Nexion interprets Terracotta

TERRACOTTA |

The inspiration for the Terracotta collection is self-explanatory. The most ancient ceramic material, terracotta - with its characteristic reddish hue and porous consistency - has been used since the dawn of time, in all civilisations, and continues to find contemporary applications. An underlying theme that has accompanied the entire history of humanity, allowing the production of buildings, tools, sculptures, and other artistic creations.

Using its extensive knowledge of the raw material and its equal production mastery, Nexion has chosen a type of terracotta widely used in Italy for the construction of its world-renowned old towns, recreating the colour tones and surface finishes down to the smallest details, with three appealing colour options offering different levels of light.

The result is a collection that offers the unique personality of an archetypal material with a contemporary language and excellent technical qualities (strength and longevity), making it ideal for complex and challenging architectural projects. A collection that brings with it inspiration from the best of contemporary Italian design, in all settings and circumstances.

Nexion Technical info

Nexion is committed to offer to customers the finest Italian ceramic design and quality. Driven by a sense of partnership with those who have decided to promote and sell Nexion branded products, we are also committed to help dealers and sales representatives to be successful in their business.

This Catalogue has been designed to help professional sales representatives to get the best possible understanding of the unique characteristics of Nexion's collections, to the benefit of the advice they give to households, architects and developers and for the best performance of their business.

Nexion's focus on quality

Surface aesthetics

While physical and chemical characteristics are described by norms and are measured objectively, aesthetical quality is left to individual company practices.

This might be an issue for customers, as aesthetical characteristics – such as realism of colors and absence of defects and shade variations – are very important for the beauty of flooring and wall surfaces.

To guarantee the best possible quality to customers, Nexion has devised innovative procedures and instruments that guarantee the absence of defects and full compliance of products with what Nexion designers meant to achieve when they created Pompeii Marble.

The pillars of Nexion's proprietary procedures to assess slabs aesthetics are the **Surface Reflection Control System (SRCS)** to control of perfect, mirror-like reflection of full lappato surfaces and the

Shade Control Methodology (NSCM) to guarantee the absence of any defect in graphics and design, as well as unwanted shade variations with reference to the designer's master slab.

Consistently applied, these procedure guarantee that all tiles supplied by Nexion have the same unique aesthetics, irrespective of production batches. A great value to customers.

Shade Control Methodology

Label:

Product item code (size, collection, color and finishing)

Choice (always Premiere - meaning "no defects" for Nexion customers)

Shading for Nexion reference (according to NSCM)

Nexion's focus on quality

Quality assurance procedures

Superior physical and chemical characteristics – together with beautiful aesthetics – are the distinguishing feature of Pompeii Marble, as of all Nexion collections.

To achieve the highest quality standards Nexion exploits decades of experience at both Ceramiche Speranza in Italy and Aghara family in India and devotes significant resources to continuous improvement.

Nexion's plant in India – the only one co-owned by an Italian and an Indian company – exploits the latest Italian machinery to manufacture high quality slabs and large size tiles.

The plant has a very high degree of automation, as required to consistently achieve the high levels of quality demanded by sophisticated customers in India and internationally.

According to the best practice, quality standards refer to the norms included in ISO 13006: Annex G - EN 14411 and all tests are carried out by renowned laboratories in Italy, accredited according to ISO/IEC 17025:2005.

At the plant, Nexion runs tests on all raw materials, semi-finished goods and end-products through the whole production process, under coordination of the Quality Assurance Department.

To get the best possible result, the company has devised an integrated set of rules, named **Nexion Quality Assurance Procedures (NQAP)**, to control all aspects of slabs manufacturing, that determine the physical and chemical characteristics of products.

NQAP include measurement processes, benchmark values and operating procedures for:

- **Chemical characteristics of raw materials**, asking for every single shipment is tested before the raw material enters into production process.
- **Intrinsic physical properties of slabs and tiles**, such as caliber and dimensions, orthogonality, planarity, water absorption and breaking strength.
- **Usage-related properties of products**, such as resistance to scratch and abrasion, thermal shock resistance, resistance to acid, stains, household chemicals and slippery.

Nexion's focus on quality

Parameters of physical & chemical quality

Though the main focus of customers is on aesthetics, physical features and chemical properties of slabs and tiles are very important for the eventual result of any surface installation and, in the end, for customer's satisfaction.

Physical features are important for the ease and quality of installation and for some aspects of durability, in particular with slabs and large size tiles, that cannot be installed properly if their geometry is not perfect and that might break if not flexible enough (contrary to conventional belief, a slab is more robust if flexible rather than rigid).

The key physical features are:

- **The sharpness and regularity** of geometrical dimensions, as well as the overall surface quality (for whose assessment Nexion has devised a proprietary set of procedures – described in the next section – that goes well beyond ISO norms)

- **The physical properties** that affect installation and durability.

Chemical properties are important for maintenance and other aspects of surface durability, as they determine resistance to stain and acids, as well as cleanability.

QUALITY ITEMS	TECHNICAL FEATURE	STANDARD METHOD ISO	REQUIREMENTS		NEXION Values	
			%	mm	%	mm
DIMENSIONS AND SURFACE QUALITY	LENGTH AND WIDTH	UNI EN ISO 10545-2	±0,6%	±2,0	±0,2%	±2,0
	THICKNESS		±5%	±0,5	±5%	±0,5
	STRAIGHTNESS OF SIDES		±0,5%	±1,5	±0,2%	±1,5
	RECTANGULARITY		±0,5%	±2,0	±0,33%	±1,5
	FLATNESS		±0,5%	±2,0	±0,26%	±1,5
	SURFACE QUALITY	A minimum of 95% of the tiles shall be free from visible defects that would impair the appearance of a major area of tiles		Compliant		
PHYSICAL PROPERTIES	WATER ABSORPTION	UNI EN ISO 10545-3	E _s ≤ 0,5% Individual maximum : 0,6% (absorbed water mass)		Compliant	
	BREAKING STRENGTH	UNI EN ISO 10545-4	Min 1300 N		≥ 1800 N	
	MODULUS OF RUPTURE		R ≥ 35 N/mm ² Not applicable to tiles with breaking strength ≥ 3000 N		R ≥ 35 N/mm ²	
	FROST RESISTANCE	UNI EN ISO 10545-12	Required		Compliant	
	COEFFICIENT OF LINEAR THERMAL EXPANSION FROM AMBIENT TEMPERATURE TO 100° C (K ⁻¹)	ISO 10545-8	Required		6 x 10 ⁻⁶ K ⁻¹ max	

Dimension and surface characteristics

The first four parameters measure the geometry of slabs and tiles.

Flatness measures the perfect alignment of the edges, the corners and the center of the tile. It is very important to achieve a perfectly flat floor or wall.

Nexion's products have very high flatness, perfect straightness of sides and all the same caliber, allowing high quality installation of slabs and large size tiles, in single and multiple size patterns.

Surface quality demands that a sample of at least 25 tiles is free of any defects when watched under a light of 300 lux, from a distance of 1 meter.

The very generic nature of this standard is the reason why Nexion has devised its own procedures to assess the aesthetical quality of slabs and tiles.

Intrinsic physical properties

Water absorption indicates the mass of water absorbed under immersion and boiling. A very low value, characteristic of

high quality tiles, is needed to avoid patches in the surface due to humidity emerging from the laying bed.

Nexion has very low water absorption, in line with the best tiles made in Italy.

Breaking strength and module of rupture indicate the tiles' resistance to flexion and loads. High values mean that slabs and tiles will not break under weight, with requirements depending on the application (residential, commercial, industrial ...).

The high breaking strength of Nexion's slabs and large size tiles guarantee safe and long lasting installation.

Frost resistance, coefficient of linear thermal expansion consider the temperature variables that the ceramic material can be subjected. These tests consider extreme hot-cold environmental situations that may be present in outdoor installation.

Thanks to thermal characteristics, Nexion slabs and tiles can be safely used in exterior.

Nexion's focus on quality

Parameters of physical & chemical quality

User related physical properties

Scratch hardness, expressed with the Mohs scale, is the resistance of the surface to incision and scratching, a very important features for customers. According to EN 101 norm, tiles are classified from 1 to 10 based on the hardness of minerals used to scratch them (Mohs is 1 Talc - 2 Gypsum - 3 Calcite - 4 Fluorspar - 5 Apatite - 6 Feldspar - 7 Quartz - 8 Topaz - 9 Corundum - 10 Diamond). The highest is the value, the lowest is the risk of scratching or incision.

Surface abrasion resistance determines resistance of the glaze surface to wear and tear. According to ISO 10545-7 standard, tiles are divided into five grades depending on their destination of use (residential, commergial light traffic, collercial heavy traffic...). PEI 1 corresponds to the lowest resistance and PEI 5 corresponds to the most resistant tiles.

Nexion meets the highest standards in the industry and always advice clients on the most suitable products to use when the project requirements are highly demanding (as for heavy traffic public spaces).

QUALITY ITEMS	TECHNICAL FEATURE	STANDARD METHOD ISO	REQUIREMENTS	NEXION Values
PHYSICAL PROPERTIES	SCRATCH HARDNESS (Mohs scale)	EN 101	Declared by the producer	Min 4
CHEMICAL PROPERTIES	RESISTANCE TO STAINING	UNI EN ISO 10545-14	Minimum Class 3	4-5
	RESISTANCE TO HOUSEHOLD CHEMICALS AND SWIMMING POOL SALTS	UNI EN ISO 10545-13	Minimum GB	GA (No visible effect)
	RESISTANCE TO HIGH AND LOW CONCENTRATIONS OF ACIDS AND ALKALIS		To be reported	GLA - GHA (No visible effect)
	SLIP RESISTANCE		Declared by the producer	N. A.

User related chemical properties

Resistance to staining is a key features for customers in both residential and commercial applications. To measure it, staining agents are left on the ceramic surface for 24 hours in at least five test samples. After that time, removal of the staining agents takes place in successive stages using a variety of cleaning agents and procedures;

- Class 5: stains removed with hot water
- Class 4: stains removed with a weak commercial cleaner
- Class 3: stains removed with strong commercial cleaning agents
- Class 2: stains removed with solvents such as acetone.

According to norms, ceramic tiles must reach at least Class 3. Nexion slabs and tiles are top quality Class 5 products, a very important feature for all customers.

Resistance to household chemicals and swimming pool salts is the ability of the glaze to tolerate contact with chemicals (domestic, sanding, swimming pool, acid

and base additives) at room temperature without any alteration of appearance.

Resistance to high and low concentrations of acids and alkalis.

Nexion products show the best results, with no any visible alteration slabs and tiles surface.
